-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

**Period for Reply**

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

1. Claims 1-30 are presented for examination.
2. The abstract of the disclosure is objected to because the current abstract does not reflect the inventive feature of the claimed invention to distinguish over the prior art. Correction is required. See MPEP § 608.01(b).

All amended abstracts are to be submitted on a **separate sheet**.

3. The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

4. Claims 1-30 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

(a) Claims 1-3, it is not clear what is meant by "updating the memory resource to prevent a data hazard".

(b) Claim 5, it is not clear what the tracking informations represent.

5. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

(e) the invention was described in (1) an application for patent, published under section 122(b), by another filed in the United States before the invention by the applicant for patent or (2) a patent

granted on an application for patent by another filed in the United States before the invention by the applicant for patent, except that an international application filed under the treaty defined in section 351(a) shall have the effects for purposes of this subsection of an application filed in the United States only if the international application designated the United States and was published under Article 21(2) of such treaty in the English language.

6. Claims 1-4 are rejected under 35 U.S.C. 102(e) as being anticipated by Arnold et al, U.S. Patent No. 6,715,060.

Arnold et al teaches the invention as claimed in claim 1 including a method of accessing a memory resource, comprising:

(a) processing a first instruction in an instruction pipeline (col. 1, line 37; col. 10, line 12), wherein the first instruction requires access to the memory resource,

(b) processing a second instruction in the instruction pipeline (col. 1, line 39; col. 10, line 31), while the first instruction is being processed, wherein the second instruction requires access to the memory resource,

(c) updating the memory resource to prevent a data hazard (col. 2, line 59; col. 10, line 60) based on an order of receipt of a first instruction response and a second instruction response, and

(d) updating the memory resource includes not writing first instruction response return data (col. 10, line 59) subsequent to receipt of the second instruction response – claim 2, and

(e) wherein updating includes storing logical values in a data structure associated with memory resource by setting and resetting tracking bits (col. 8, lines 29 and 39; col. 10, line 38) – claims 3 and 4..

7. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Arnold et al (6, 470, 445) taught a method of preventing WAW hazard.

Brown, III et al taught a method of using scoreboard with counters.

8. Claims 11-30 are allowed over the references of prior art.

The references do not teach the method of changing stored primary and secondary pendency information, associated with first and second instructions respectively, based on the order of receipt of responses of the first and second instructions.

9. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Kenneth S KIM whose telephone number is (703) 305-9693. The examiner can normally be reached on M-F (8:30-17:00).

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Mark Rinehart can be reached on (703) 305-4815.
